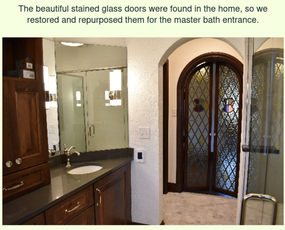
Ladue Home Renovation!

We've been fortunate to work on this lovely Ladue home, and we are excited to share it with you!

This major kitchen renovation was a really fun project. The original kitchen had re-faced retro blue metal cabinets and tile floor. New flooring, cabinets, counters, appliances, lighting, tile, and paint give this kitchen an updated, traditional look.

The guest bathroom got a clean new look with updated tile, vanity, toilet, shower, fixtures, and paint. What a difference for such a small space!

The beautiful stained glass doors were found in the home, so we restored and repurposed them for the master bath entrance.



This master bathroom is located in the second floor turret and created unique challenges. We were able to enlarge the bathroom to add a separate water closet and new master closet. We had custom milled trim made to frame the beautiful original stained glass doors. New tile, vanities, lighting, mirrors, fixtures, new custom curbless shower base and framless glass enclosure finished up this spectacular master bathroom.

We added dramatic wallpaper in the powder room to coordinate with the preserved green tile. Go bold with small space and you will not be disappointed!

This was just a portion of the work we did in this home. We also installed closet systems, new hardwood flooring, refurbished the grand staircase and finished the basement.
