Kirkwood Home & Landscape and Julie's Garden Design Newsletter

January Greetings!

We are focusing on new garden designs this winter and wanted to share a little color with you! Our design software made it easy to design this large pool house cottage garden.
Nothing boosts your mood like flowers!

The weather has been mild enough for the landscape team to continue working on hardscape projects this winter. We transformed an old crumbling rock wall into this beautiful stone wall. This project not only gave the client peace of mind, it also added more outdoor living space with a larger patio!

The construction team updated this kitchen. The new counters and cabinets gave it a refreshing look the client was hoping for! It is so much brighter now!

If you are feeling winter weary, now is the time to force branches!
It's very simple, just cut branches from a flowering tree or shrub and bring them inside. Place them away from the heaters or direct sunlight and change the water every few days. That's it!!

Enjoy all the winter season has to offer friends!
We appreciate your business!

We are a unique 3 function company that can handle everything for your home!
