KIRKWOOD HOME & LANDSCAPE

Julie's Garden Design

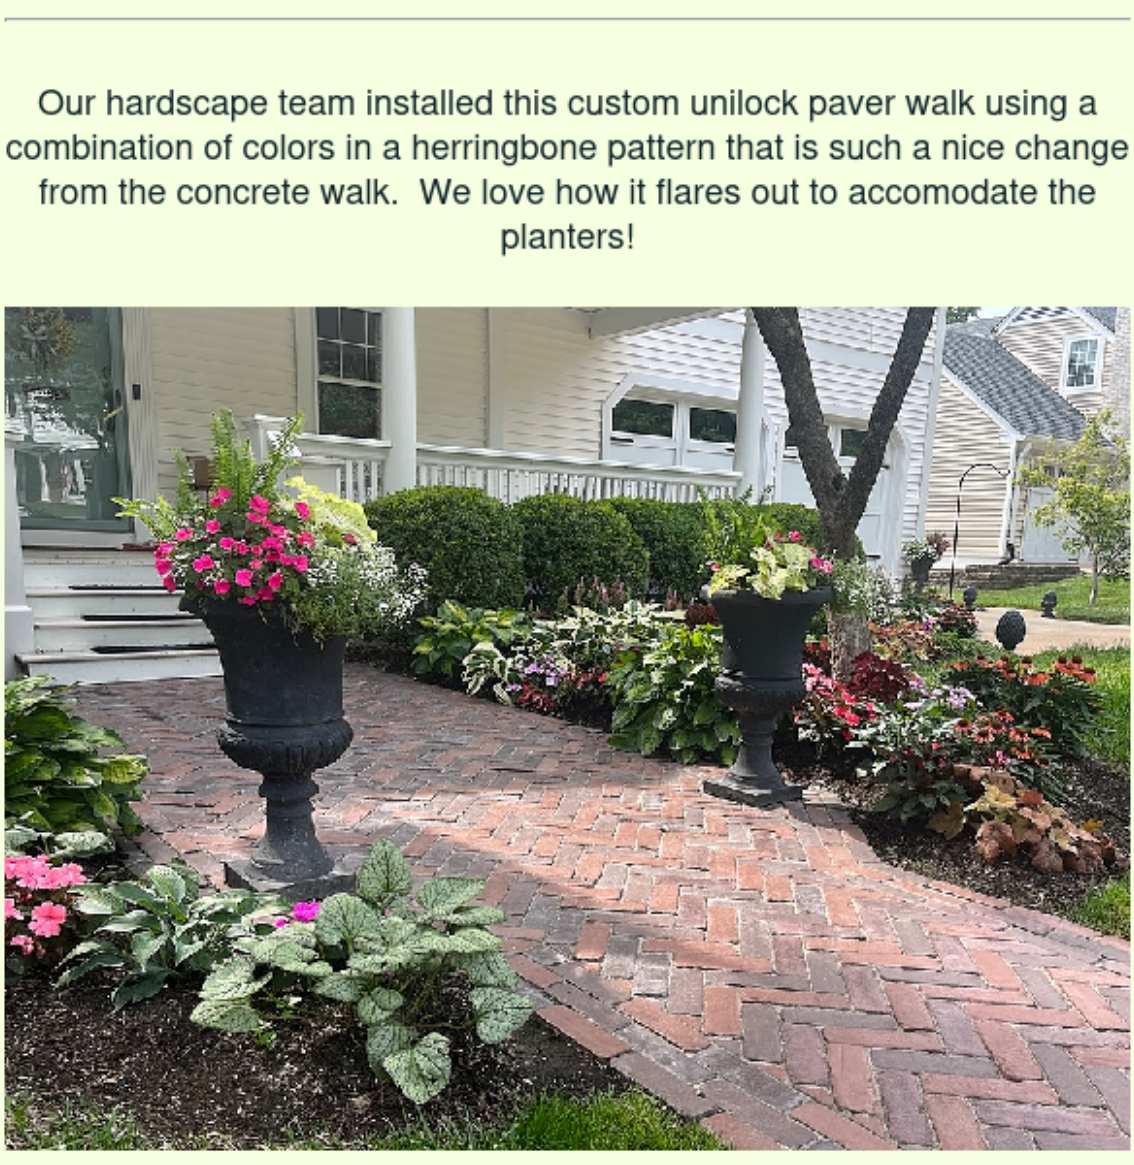
Summer has arrived!

Don't forget to give your plantings a little extra water during this heat wave.

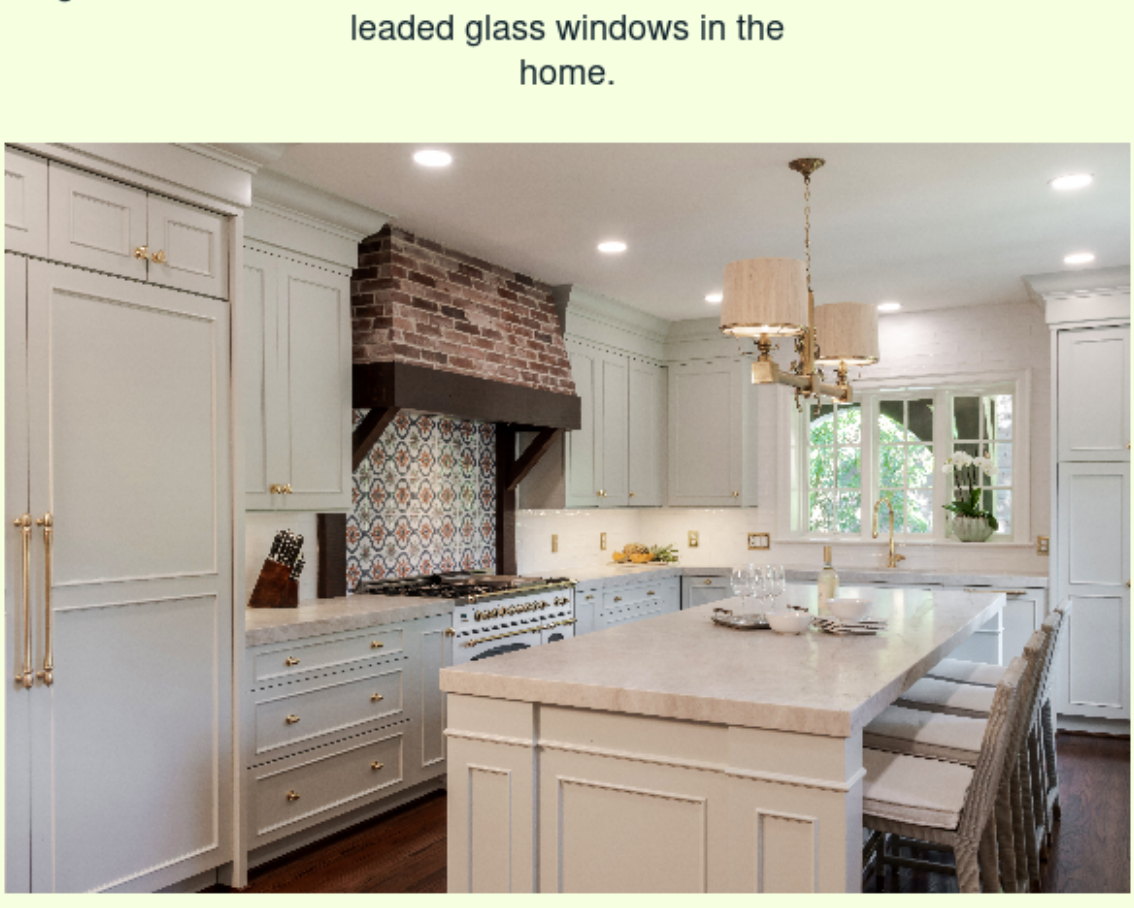
We have been busy creating this wildlife sanctuary that not only looks beautiful, it also remedies a water control issue. The team ran dry creek beds around the perimeter of the property that filters the water into a dry well disguised as a pond. Pond gazing has become alot more fun with all of the wildlife that visits each day!

Call to schedule an appointment today.
Water Control ~ Patios ~ Walks ~ Walls

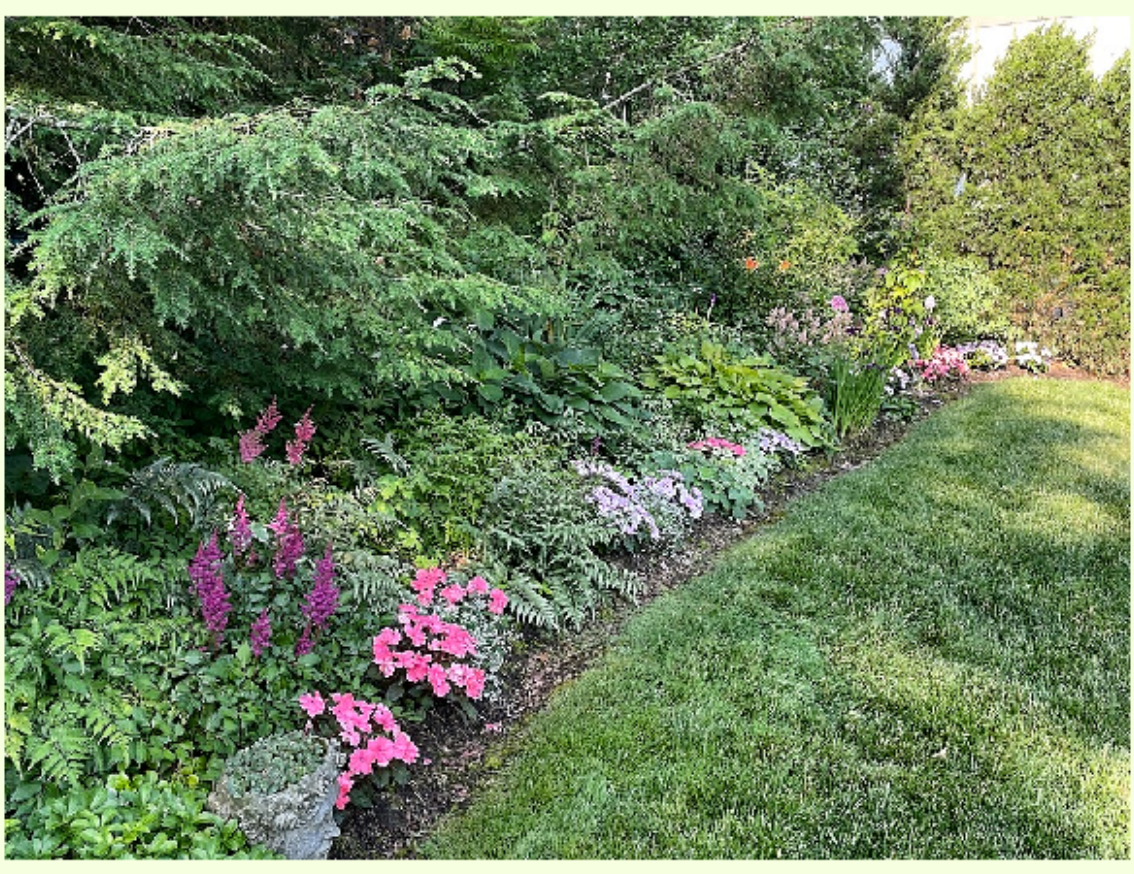
Our hardscape team installed this custom unilock paver walk using a combination of colors in a herringbone pattern that is such a nice change from the concrete walk. We love how it flares out to accomodate the planters!



"That's a Winner!"
Our construction division won the Home Builders Association Award for Remodeling Project of the Year for a kitchen in the $300,000 range at Jack Bucks former home.
We removed a wall between the laminate-covered craft room and original kitchen to create a large functional kitchen for our clients. Removing an elevated floor and creating a new arched opening from the foyer gave better flow, and allowed space for an oversized island with seating for five. To mirror the style of the home, the client had us design and build a custom range hood. We cut bricks that were original to the property into veneers and installed them on the hood. Custom art glass was fabricated and used in some cabinet doors to match the leaded glass windows in the
home.



We are grateful to be caring for your gardens and hope you have time to enjoy them as much as we do this summer!



We appreciate your business!

We are a unique 3 function company that can handle everything for your home!
